**CENTER FOR
ASSISTIVE
TECHNOLOGIES TO
ENHANCE HUMAN
PERFORMANCE**

About the Center

The iPerform Industry/University Cooperative Research Center (I/UCRC) is NSF-funded and represents collaborations of professors and scientists at UT Arlington and UT Dallas with industry partners. The primary mission of the center is to bring university and industry researchers together in order to advance basic and applied research in Assistive Technologies (ATs) for the enhancement of human performance.

Research and Application

ATs optimize how humans interact with objects, data, services, products, software, hardware, etc. ATs also impact performance for healthy individuals and those with disabilities at home, at work, online, or onsite.

Research areas include big data, smart materials, new sensors, bioengineering, simulations, software/hardware integration, and others.

Applications include robotics, medicine, healthcare delivery, energy conservation, security, transportation, manufacturing, training, and others.

New opportunities for investment and advertising

Access to cutting edge research projects

Connections to other center members

Targeted employee recruiting and training

Benefits for Industry Partners

Membership and Fees

All members have common ownership of the center, with funds channeled through the Grants & Contracts Office (10% overhead). Membership goes to support projects voted by the IAB during semi-annual meetings.

Full membership:

\$50,000

1 full vote on all center projects!
